EDUCATION

Grandview High School, Aurora, CO — Class of 2027

GPA 3.81 unweighted, 4.56 weighted · SAT 1520 (superscore)

EXPERIENCE

Safar, *Founder & Developer* — May 2026 – Present

Routing, invoicing and inventory software for wholesale distributors · live demo at safar.haanie.com

- Built the system a Denver wholesale distributor runs on daily, delivered as a paid build: 344 invoices, 283 active customers and 403 store visits logged by 3 field reps since July 2026 launch.
- Replaced duplicate entry across QuickBooks and Excel by running Safar in parallel until one entry did the work of both.
- Built routes around overdue balances so reps collect on stops they already run; the owner has made no separate collection trip since August.
- Fixed 22 issues in a security audit before the first real invoice, so no account can see another business's data.
- Planned the product and built it with AI coding tools: 442 commits, 107 database migrations, automated tests on every pull request. Native iPhone and Android app in progress.

Steel City Codes, *Regional Director, Denver* — 2024 – Present

Nonprofit teaching students to code at no cost

- Direct the Denver region serving 200+ students: grant writing, volunteer management, curriculum.
- Built a registration platform where volunteers choose their own classes, replacing hours of manual matching; piloting in February.
- Wrote and teach intermediate Python and MicroPython (Raspberry Pi Pico) courses at the two-week summer camp.

Grandview FBLA, *Data Officer* — 2025 – Present

- Rebuilt and run the chapter's registration app for 180+ members: sign-ups, teams, rooming and state conference.
- Automated state qualification by importing placement results; lead a three-person development team.

South Asian Student Association, *Director* — 2025 – Present

HONORS

FBLA State Champion, Website Coding & Development — 2026

FBLA State Champion, Website Design — 2025

DECA 2nd Place, State, Integrated Marketing Campaign–Product: pitched Meta smart glasses to the blind and low-vision community — 2026

National Merit Commended Scholar — 2026

AP Scholar with Distinction — 2025

SKILLS & INTERESTS

Technical: AI coding tools (Claude Code), Python, MicroPython, Java, Git and GitHub

Product: Gathering requirements from users, field testing, training staff on new software, grant writing

Languages: Spanish (through Spanish 4 Honors)

Interests: Pickleball (entering tournaments), snowboarding, JV tennis
